Background

Product-focused Engineering Manager with 7+ years experience across full-stack engineering and technical leadership, currently leading Recharge's Storefront Experience team. Known for combining technical knowledge, people leadership, and a focus on performance, reliability, and collaboration.

Experience

Recharge Payments - Storefront Experience Team

Engineering Manager

Remote

July 2025 - Present

- Lead the Storefront Experience engineering team, managing frontend, backend, and QA engineers focused on delivering high-performance, merchant-facing checkout solutions in direct partnership with Product and Design.
- Ownership of a wide range of critical services across the full merchant and shopper product areas: high-scale storefront widgets that drive measurable growth in converting one-time buyers to subscribers; the Merchant Portal, powering analytics, AI-generated custom reports, and more; and the Customer Portals, where subscribers manage their subscriptions..
- Built out our Checkout Incentives product with 8 different offerings, generating monthly recurring GMV of ~\$1.7M in subscription revenue.
- Directed the design and operation of mission-critical backend infrastructure, including SQL and document databases, CDN caching layers, event-driven systems, and REST APIs, ensuring sub-second checkout performance and platform stability.
- Drove a post-purchase upsell swap proof-of-concept in under a week to support a strategic merchant opportunity, accelerating deal confidence against a direct competitor.
- Led incident response coordination across multiple production incidents, including directing a 50+ person cross-company effort to manually remediate affected charges.
- Partnered cross-functionally with Product, Marketing, Support, Design, and Data Engineering to translate requirements into well-defined engineering scopes, keeping initiatives aligned from scoping through go-to-market.
- Remained hands-on technically — triaging escalation and security tickets, contributing code, and using codebase context to accelerate unblocking engineers in design reviews and PRs

Senior Software Engineer - Fullstack

June 2024 - July 2025

- Led migration of cloud functionality from Google Cloud Platform to DAPR & Kubernetes, which led to saving tens of thousands of dollars per month.
- Led the development of Checkout Incentives Analytics. Built new analytics data pipeline and APIs using Flask, and UI pages with React.
- Maintained and modernized legacy UI features by supporting Vue app while migrating functionality to Remix.

The MITRE Corporation

Lead Software Engineer

Senior Software Engineer

Software Engineer

Bedford, MA

May 2023 - May 2024

March 2020 – May 2023

September 2019 - March 2020

- Technical Lead for a team of 4 engineers, developing a high-visibility, high-impact prototype to advance novel concepts of Situational Awareness for warfighters in complex battlespaces, directing architecture and feature planning based on multi-sponsor requirements.
- Technical Lead for an enterprise-wide capability tool for collating, visualizing, exporting, and modifying scenario experiment and design data, leading a refactor that prioritized code reuse across sponsors.
- Developer on The Fight Is In Us, a COVID convalescent plasma research project that helped save an estimated 96,000 lives, generated 100,000+ donation referrals, drew 7M+ site views, and led to \$29M in additional funding.
- Provided technical mentorship to junior developers and interns across multiple sponsor spaces (healthcare, aviation, national security), and built full-stack features using D3, Vue.js/Express, and Flask.

Education

Georgia Institute of Technology

MS Computer Science, Specialization in Machine Learning

Remote

University of Michigan

BS Computer Science, Minors Physics & History

Ann Arbor, MI

Additional Skills

- Languages: **JavaScript** (Vue.js, React, Remix, Node.js), **Python** (Flask, Django, Pandas), PHP, SQL,
- Technical: Docker, DAPR, Kubernetes, Traefik, Bash, Gitlab-CI, Bamboo, SQL, MongoDB, Git, CSS
- Non-Technical: Communication, Organization, Mentoring, Positivity, Adaptability
